

Flight of Fantasy: Akoya

Akoya, the iridescent white pearl of Japan, lends its name to this jewel of high-end technology. The Akoya provides pilot and passenger with breathtaking 180-degree panoramic views of snow-capped mountains, tropical beaches and forested islands. This versatile aircraft, equipped with hydrofoils and retractable skis, is designed to fly from airstrip to yacht to ski slopes. The lightweight composite Akoya has a 932-mile range and reaches a 185-mph maximum speed. This lean and futuristic aircraft is fitted with wing and engine cowl hooks for easier lifting and features a wing that swivels into alignment with the fuselage for easy loading and narrow storage on the yacht or in the tender garage. The purchase price of about \$430,000 includes the ULM pilot license, training on water and snow, custom paint and various accessories.

Length: 23' - Wingspan: 36' - Empty Weight: 630 lbs.
